ThreatQuotient Introduces First Threat Intelligence Platform to Answer Industry Demand for More Fine-Tuned Controls and Streamlined Threat Operations

RESTON, Va.--(BUSINESS WIRE)--

ThreatQuotient™, a trusted threat intelligence platform innovator, today announced new ThreatQ platform advancements, a robust Partner Integration Program and Professional Services offerings to answer industry demand to make threat intelligence operational within the context of a company's specific environment. With these new offerings, ThreatQuotient is leading the charge for security operators, threat analysts and business executives who need faster, richer insights to make accurate decisions and improve their security posture.

"The industry has realized that the aggregation and sharing of threat data is not enough to succeed. Threat intelligence platforms need to do more to support the utility of threat intelligence as part of security operations," said Leon Ward, Senior Director, Product Management, ThreatQuotient. "ThreatQ has been purpose-built to support the threat operations within a company. It is designed to help customers focus their resources on the high-risk items that are most pertinent to their business."

ThreatQ 3.0

Companies are being challenged by too much threat data, and without comprehensive context, it is hard for operators to identify a starting point for investigations. ThreatQ 3.0 solves this challenge through automated

To address these challenges, ThreatQ has the only self-tuning Threat Library, updating priority and relevance based upon the customer-defined parameters, as more data and context comes into the system. With validated context and a stronger understanding of what data is the most relevant to their company, operators can cut through the noise and focus their investigations on the highest risk threats first. ThreatQ is the best platform to serve as the cornerstone for a company's security operations and the use cases relying on threat intelligence.

ThreatQ enables successful cyber threat operations and management by empowering teams to collaborate on intelligence, manage defenses across their

extensible architecture, allowing for strong integration and interoperability with existing infrastructure. ThreatQuotient's new Partner Integration Program is a robust ecosystem that leverages the ThreatQ Open Exchange through a software development kit (SDK), easy-to-use application programming interfaces (APIs) and a comprehensive set of industry-standard interfaces to fully integrate with the equipment, tools, technologies, people, organizations and processes that protect your business.

ThreatQ allows both standard integrations and BYO connectors and the platform can easily enable more. Representative partners in the program include: Cisco, CrowdStrike, DomainTools, Farsight Security, FireEye, Flashpoint, Phantom, Recorded Future, Symantec, Verisign, VirusTotal and Wapack Labs. The full list of over 50 integration partners can be found [here](#).
